

SPECIFICATION

- Tined weeder are suitable for mechanical destruction of weeds during the growing of cereals, potatoes, corn, beets, oilseed rape and most of other vegetables.
- In the grassland, the structures of moss or lichen are disturbed. It causes rejuvenating of grass cover and its aeration.
- The work done by this machine influences loosening the soil, improving the accessibility of nutrients and aeration the soil.
- Tines with diameter 6, 7, or 8 mm are the main working units that are set up in 6 rows with distance of 25 cm.

MACHINE FUNCTIONS

- Simple construction with simple maintenance features
- Great copying effect due to swinging frames and support wheels
- Adjustable tine aggressivity
- Simple and fast tine exchange
- Additional straightening rake

MACHINE ADVANTAGES

- Disruption of soil crust
- Soil aeration
- Possibility of fertilizer application
- Offshoot support
- Weed control
